CCRPC Scoping Study

- **2018 Study Document**
 - Project Background
 - Community Engagement
 - Purpose and Need
 - Alternatives Analysis
 - Recommended Alternative

- **2019 Supplemental Study Document**
 - Wetland Delineation
 - Topographic Survey
 - Right-of-Way Mapping
 - Utility Mapping
 - Cultural Resource Assessment

- Why was the alignment chosen?
 - Shortest Span/Least Capital Cost
 - Minimize operational and maintenance costs
 - Future Exit 14 Reconfiguration
 - Fit ADA ramps
 - Stormwater treatment
 - Meets City and regional goal to provide safe alternative transportation links between neighborhoods, employment, and commercial destinations

Frequently Asked Question:

Where will the new bridge connect to?

Connection to
Williston Road

Future Connection
to Quarry Hill

Connection to
Williston Road

Connection to
Hotels / CVS

Connection to
University Mall

Frequently Asked Question:

What is the Project Budget and where does the money come from?

Project Budget

- USDOT RAISE Grant \$9.8 M
- TIF District Funding \$4.3 M
- Other Local or Federal Funding \$0.5 M

- Total Project Budget **\$14,550,000**

Project Process

- Phase A – Project Definition (June – Nov 2022)
 - **Concept Design – In Progress**
 - City Council Presentation – November 7th
 - TIF District Financing on the Ballot Item
 - Conceptual Plans Development
- Phase B – Project Design (Nov 2022 – June 2024)
- Phase C – Project Construction (2025 – 2026)

Community Engagement

- Stakeholder meetings
- Focus groups
- Abutting landowners
- Workshop 1 – June 16, 2022
 - Initial Concept Brainstorming
- Workshop 2 – August 31, 2022
 - Concept Alternatives Review
- Workshop 3
 - Final Concept Review

Three Project Concepts – What did we hear?

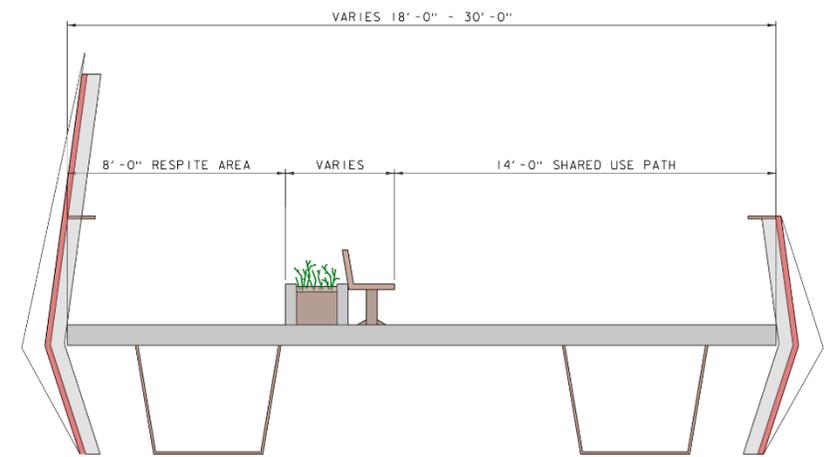

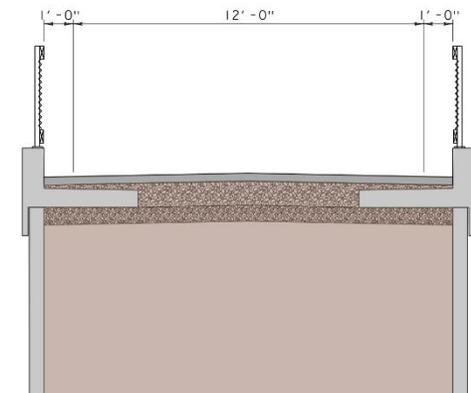

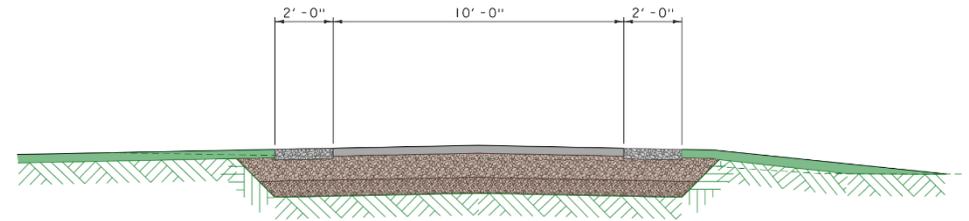

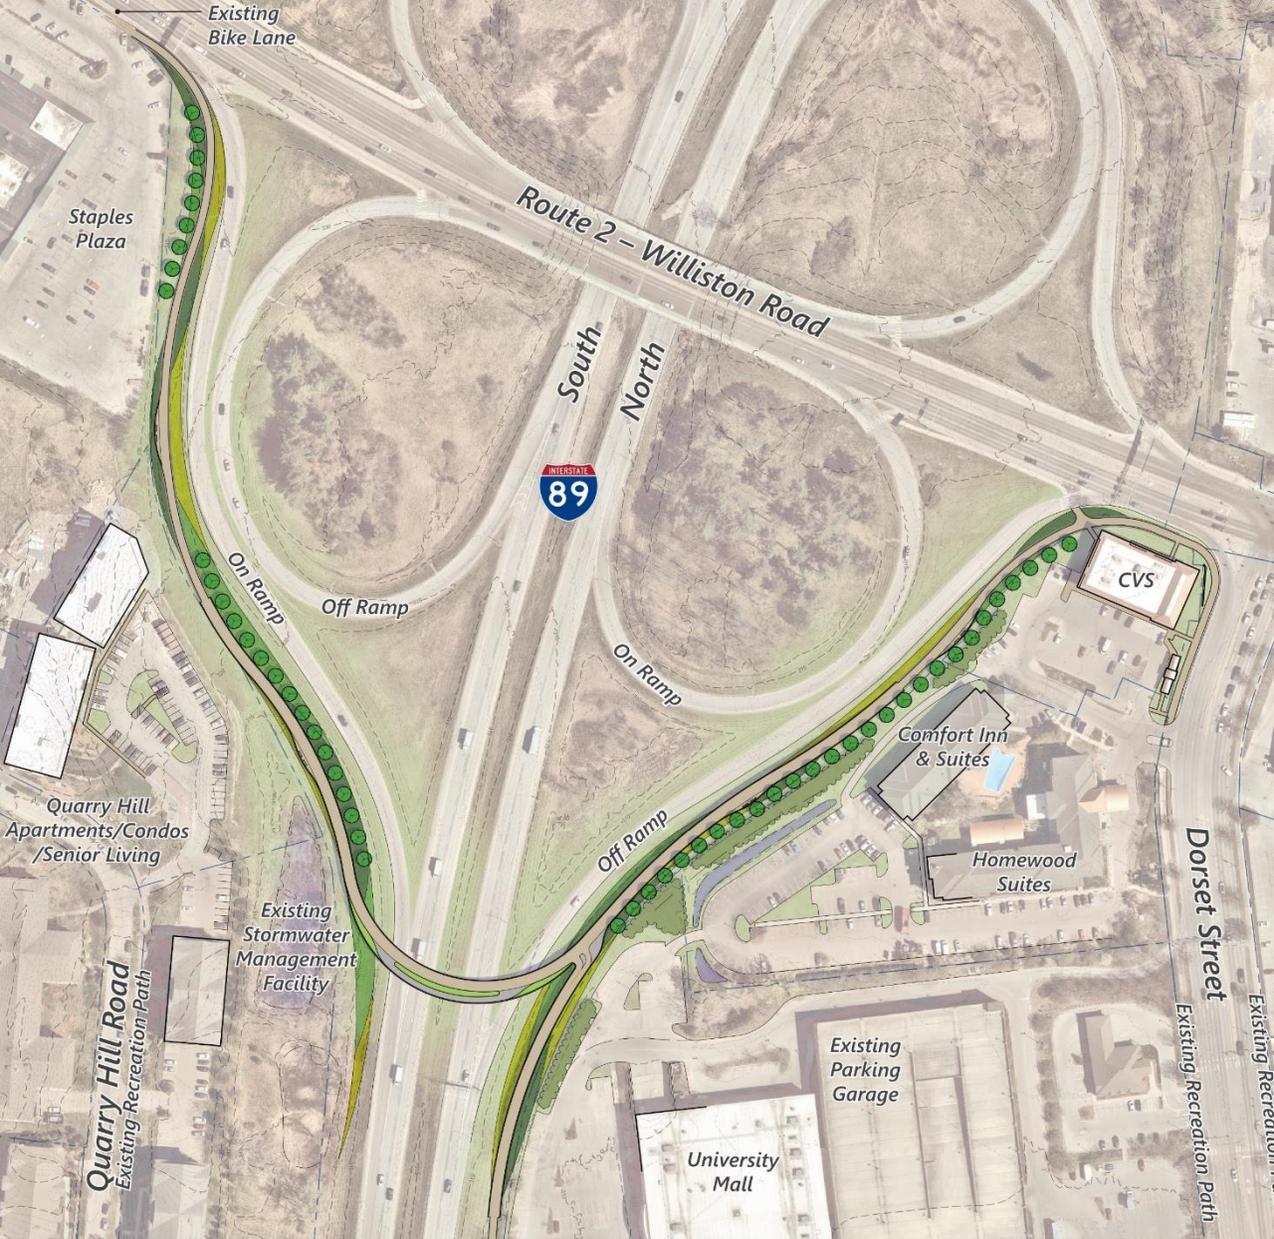

Guiding Principles

- Forward thinking design
- Transformative
- Iconic
- Inviting
- Accessible
- Safety for Everyone
- Environmental Sustainability
- Quality of Life
- Economic Competitiveness

Final Design Concept

- East-West Crossing Final Concept
 - Curvature, Sinuous Approach, 4.5% Pathway Grade, Shielding Barrier, Contrast with Surrounding Environment, Light Colors, Maximize Curves, Integrated Art
- Pathway Respite Areas
 - Minimal slope, benches, shade
- Public Art Integration
 - Bridge as an art piece, art integration throughout pathway and bridge
- Lighting
 - LED lighting throughout, visibility on the pathway surface and visibility of other pathway users
